

Objective	A motivated Computer Science Engineer seeking a challenging position as a Website Developer to utilize my skills in Python, Django web framework, and database management. Aiming to contribute to impactful web related projects while continuously learning and growing alongside an innovative technical team.
Education	Satyam Institute of Engineering and Technology, Ram Tirth Road, Amritsar, Punjab Bachelor of Technology in Computer Science & Engineering Degree is Pursuing — SGPA in 7th Sem :- 8.13 Govt. Girls Sen. Sec. School , Putlighar, Amritsar, Punjab Study Completed in PSEB •10th •12th(Completed in Non- Medical Stream) 10th Passing Year :- 2020 12th Passing Year :- 2022 — Percentage 10th = 94% 12th=92%
Skills	• Full Stack Web Development in Python
Projects	Smart Attendance Using Facial Recognition Project Advanced Tech Stack: Built a robust web application using Python, Django framework, and MySQL to automate the student logging and tracking system. AI & Computer Vision Integration: Integrated Face Recognition technology (OpenCV/Face Recognition libraries) to capture and verify student faces in real-time, completely replacing manual attendance registers. Production Deployment: Successfully optimized and deployed the live application to the Render cloud platform, configuring WhiteNoise middleware for efficient static file and asset management. Security & Testing: Handled security configurations including ALLOWED_HOSTS for production, debugged backend-frontend integration issues, and ensured consistent real-time database updates.
